# PATTERN LIBRARY

SUNCATCHERS

## Instructions:

**HAVE FUN!**

### COLOR CODE:

Black lines are pattern/cut lines and are drawn thick for use with a lightpad and not-so-transparent-but-not-quite-opaque glass. Cut on the black line or outside, depending on your skill level, as you can grind what you need to later.

Red lines are where we recommend you place U-HOOKS. Repeat after me, jump rings are the devil! Some designs have optional u-hook placement.

Blue lines are where you can use glass paint of your choice to paint details.

Orange lines (x's) are where there are voids in the pattern. That's right, no glass. In the middle of your project.

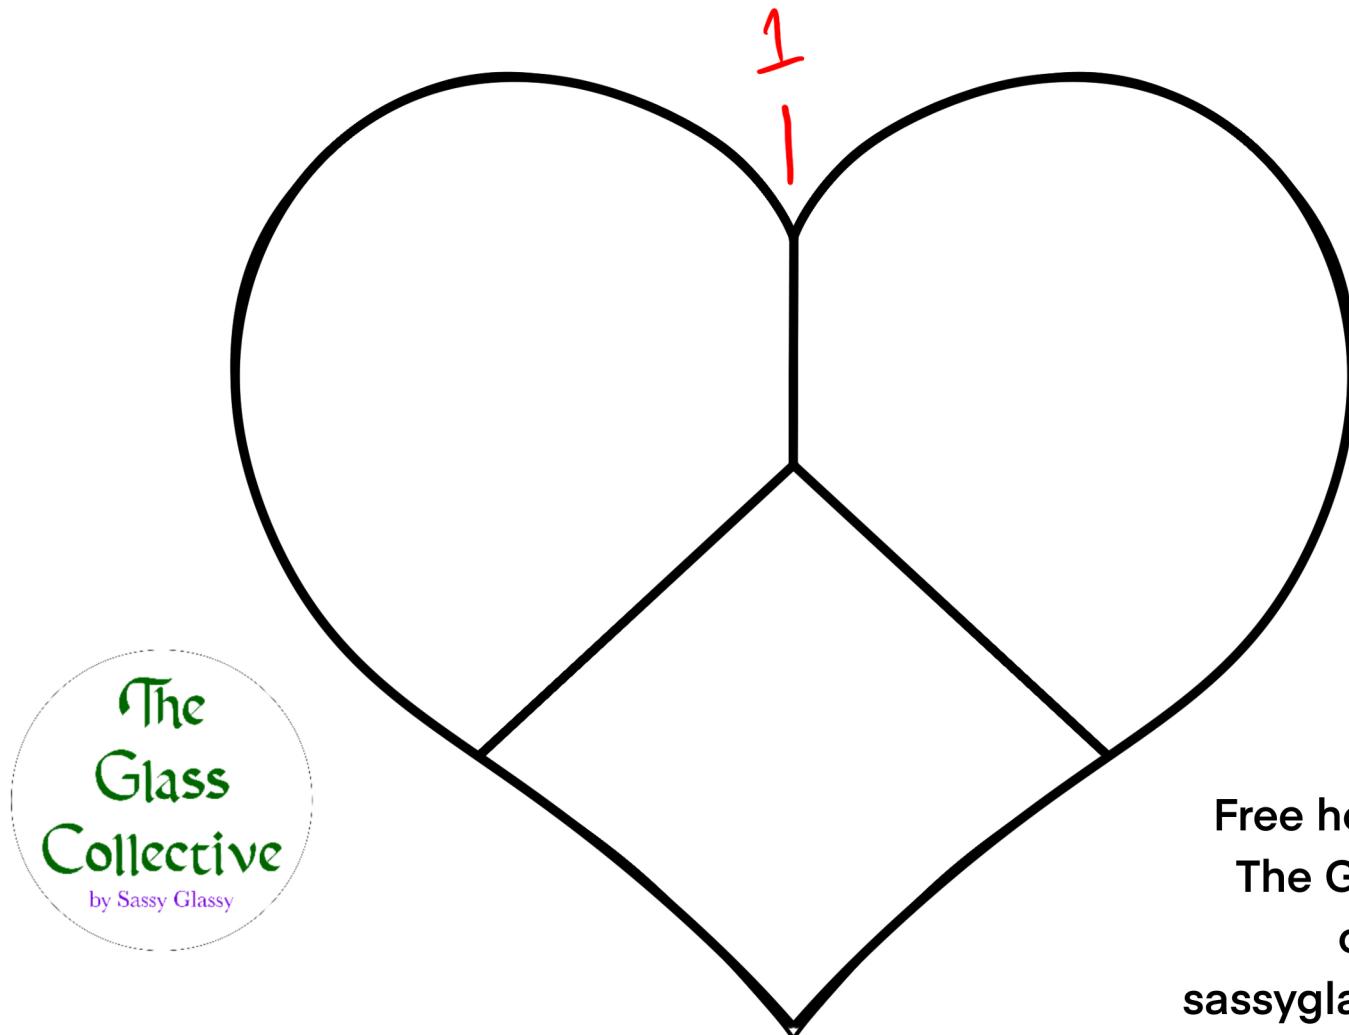

Green lines are where we recommend wire-reinforcement. Either embedded into your solder bead or your edge beading.

**Optional support:** Standardizing patterns for the Library is important so that everyone can read our patterns. Doing this takes time. If you'd like, consider supporting the existing Library, and future pattern development, here:
